Vaihalla sequel

Legend has parted with what is believed to be the largest sum of money ever spent on the production of a single game. The Great Space Race is the long-awaited sequel to Valhalla, and £1/4m is the cost of its

development.

Scheduled for launch in late September/early October, Commodore 64 and Spectrum versions will be in the shops simultaneously. Heralded as "a spectacular futuristic romp'; Legend is priding itself on the graphics and animation. You'll have to wait till September to see for yourself!

Legend, PO Box 435, Station Rd, London E4 7LX

Work from home

Now you can convert your BBC or Electron to a handy office machine, with the help of Mini Office, from Database Publica-

Mini Office comprises a word processor, database, spreadsheet and graphics package all for £5.95 in tape version or £7.95 on disc.

Managing director Derek Meakin said: "We are aiming at one man firms who cannot afford to pay for the business software currently on the market. It will also be well in the price range of housewives who wish to use it for domestic bookkeeping or children wanting to monitor their pocket money"

The word processor features a constant display of time and word count, plus a words per minute display and double size text option in edit and printer mode.

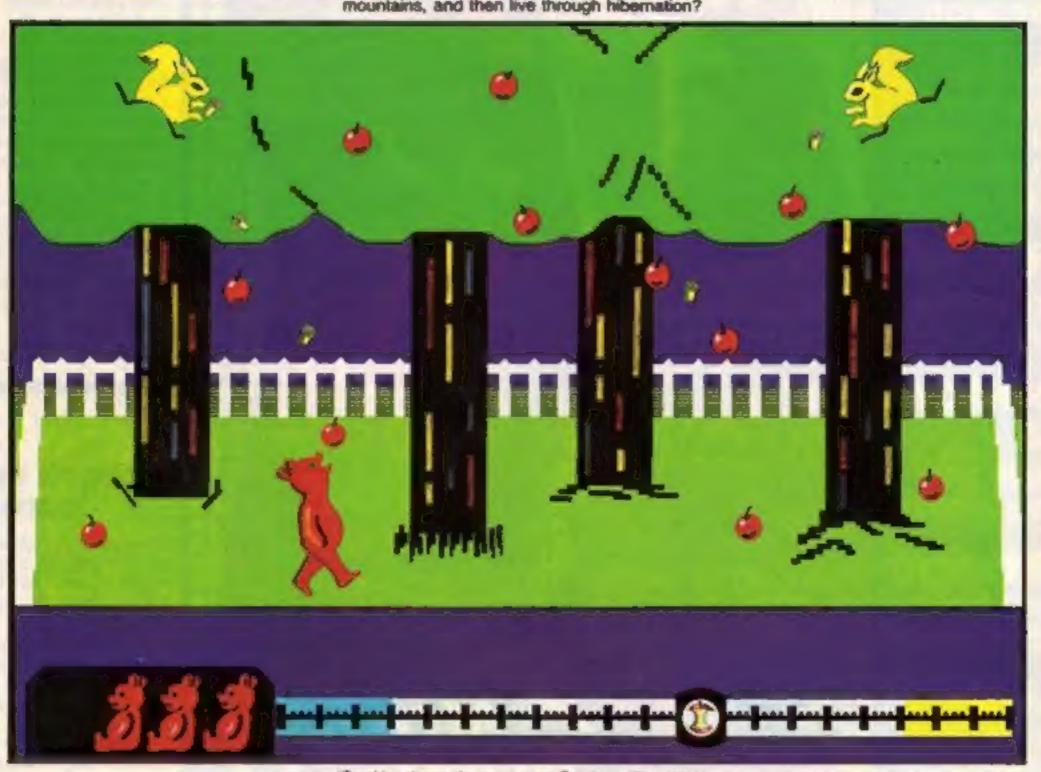

The whole package comes together with a 32-page operating guide. "At this price, home computers will no longer be restricted to games," said Mr Meakin.

Database Publications, Europa Hse, 68 Chester Rd, Hazel Grove, Stockport SK7 5NY

Sord cry for

help

I am a frustrated Sord M5 owner. Although I think it is quite a good computer, not enough software is available for it and most of the games out on cassette are worse than magazine listings. I have BASIC-G and am disappointed that no games have been written for it. Surely some of the major software companies could convert games written for 16K computers, like the Spectrum, TI-99/4A and VIC-20?

.I am also disappointed by the lack of information about PEEK, POKE and machine code, which are all needed to write fast and exciting games. I would like to get to know anyone owning a Sord M5 in my area to swap software and information.

M. R. Tallis, 145 Woodhouse Lane E, Timperley, Cheshire

Question

and answer

I own a Commodore 64 and I would like to know how you complete the third sheet on the Tale of the Arabian Knights. If anyone knows, please tell me.

Here's the answer to M. Livingstone's question (HCW 73). To cheat on Revenge, load the game. When it runs, type in "GOATS" and you will see coming up on the screen "Cheat Mode"! If you don't like a screen just press any key to go on to the next screen.

C. Ahmet, London SW2

How the

Texas works

I am writing in answer to Mark Wallhead's question (HCW 75) about the TI-99/4A character sets. The computer has more than just five or six character sets; it has 128 in all, between CHR\$(1) and CHR\$(32767). Unfortunately they are all the same one, i.e. if you change the shape of a character in the first set it will change in all the others as well.

The reason for this is that each set has its own 'page' of memory, 0 to 256 or 11111111 in binary. You can divide 32768 by 256 x 128 times, hence 128 character sets. Although the

TI-99/4A is a 16 bit computer it transfers information in 8 bit form and so when a character number is more than 256 it cannot handle it unless it is converted into a number within its range. So if you ask the computer to print CHRS(286) it will actually print CHR\$(30).

The purple characters he mentions are in fact control characters which change shape when the computer performs certain tasks but other than that I do not know of any real use for them. I hope this will be of some help to him.

Austin Platt, St Helens, Merseyside

Let us in

My brother has a 48K Spectrum and Urban Upstart. How do you get into the town hall in Urban Upstart? My brother has tried to get in, but gets the reply "Someone won't let you in"! Please help us. Jamie Barr, Midtothian

Pep up

your screen

In HCW 75 I read Tommie McCall's letter about how to add character to your screens.

My version is to design your screen and run it, then enter. SAVE "filename" SCREENS and save as normal. In his letter lines 10, 20 and 30 can be used. Line 40 should be changed to 40 LOAD "" SCREENS: PRINT ATO,0;:LOAD"". Ian Jackson, Preston

Texas OAP

fan

Thank you to Brummy Maurice Rymill for joysticking Phil Ord's Pearl Divers (HCW 73). However, his score facility was attacked by the compositor or some other gremlin and produces a string mismatch in 1132 and another cockup in 3020.

But who am I to moan? Yours is the only periodical regularly printing listings and news for our medieval Texas machines, and for that I am extremely grateful.

I am an OAP, consequently the high cost of games modules is beyond the scope of my pocket, as are the cassettes marketed

by software firms. Thus I look forward to HCW each week, hoping for another game similar to Dave Martin's Strategy Board (HCW 64) which has given my wife and me long hours of pleasure when there is only rubbish on the box.

If any of your readers have any unwanted original software and are not wanting too high a price I would be grateful if they would get in touch with me, via HCW.

Philip Munro, Prestwich, Manchester

Here's what

to do

After reading D. Moore's letter (HCW 66) about Lunar Jetman, 1 felt sorry for him and have written some points to help him play the game.

1 Pick up the bomb, using symbol shift, then fly over the Lunar Rover. As you fly past the cab (front) of Lunar Rover, release with symbol shift, so that the bomb should land right on top of the Lunar Rover.

2 Then stand between the Lunar Rover's wheels. Press break space, move the Lunar Rover using the keys for the Jetman. On screen there is an arrow near the top of the screen saying 'Alien Base' Go in the direction in which the arrow points.

3 If at any point you come across pot holes, you can Our apologies for the release the Jetman from his Lunar Rover using break space. Still between the wheels, press symbol shift. This will give you a bridge. Fly or walk across the hole. Press symbol shift to release the bridge and repeat the process until the holes are filled in.

The idea of the game is to get the Jetman inside the Lunar Rover and save on his fuel by using the Lunar Rover's unlimited supply. with the bomb on top of the Rover.

Head for the Alien Base. You will know when you get there because there are two cones in the ground and a force field. Fly with the bomb across the base, then release it. The main idea is to destroy as many alien bases as you can.

Conrad Sweeney, Coventry

Software winner

Tip for Willy

fans

I enclose a program for Jet Set Willy fans. At any point, press 'S' and the picture will automatically be saved as SCREENS.

To use, type in the program, run it and it will load the game. You will then be asked to press ENTER (you'll still need the codes).

Lennie Jarman, Colchester, Essex

Bouquets

and

brickbats

First a bouquet: If HCW is not on my breakfast table on Wednesday morning, I get withdrawal symptoms. Yours is a most readable magazine.

Having said that, a small brickbat: While I appreciate the cost of good quality printing paper, I do protest at the smallness of the print you use to print some programs. My aged eyes (I'm 50+) just can't cope.

May | suggest to Spectrum owners who can't afford an expensive monitor - use the one Sir Clive gave you. After switching on, type in:

BORDER 0: PAPER 0: INK 4 ENTER, ENTER

R.M. Jones, Stockport

inconvenience caused by the size of the printing. Sometimes lack of space means that listings must be reduced to fit in: but at least we make good use of the space, to bring you more of what you want!

Record

scores

I am writing to inform you of my record scores on the TI 99/4A.

They are as follows: Munchman - 125,310 (sheet 30); The Attack -186,400 (level 4, Stardate 16); Car Wars - 50,340 (level 3, sheet 6).

Has anyone beaten these scores?

On the subject of Texas adventure games: with my family, I have solved Pirate Adventure and Adventureland.

But, we are completely stuck on Ghost Town. I have found seven treasures: cashbox, silver spurs, silver cup, silver bullet, oriental Go-board, gold nugget,

I am trying to shoe the horse in the stable, find a gun, a hammer, and a way to open the safe in the telegraph office.

Can anybody help me?

Sally Parker, Lymm, Ches-

The key to

the problem

In reply to Mrs A. Smith's letter (HCW 74) about Mad Martha, we can help her. When you are in your bedroom, you must examine the china utensil (potty). Inside it you will find a small key. Take the key. When you arrive in the lounge, you must examine the portrait. You will find the key will in handy.

Thanks for a great mag, keep up the good work. Cathy Jones and Jacky Cranett, Mold Clwyd

Tips for

Upstart

Here are some useful tips for Urban Upstart.

If you get stuck in the Police cell, drink lager (which you can get from the fridge in the house), in the cell.

You will then be taken to the hospital, where you can get out by taking and wearing the white coat.

I think this game is the best adventure available, because there is a different graphical picture wherever you go.

I also think your magazine is equally great, and very good value.

Chris Palmer, Scunthorpe, South Humberside

Send your letters to Letters, Home Computing Weekly, No.1 Golden Square, London WIR 3AB. Don't forget to name your computer - the best letter could win £5-worth of software. Got a problem with your micro? We'll soon be starting a queries page, so send your technical questions to Queries at the above address.

Check mate

This year's World Microcomputer Chess Championship (the 4th), will take place in Glasgow from September 9 to

Any individual or group. including software houses, may enter their own chess programs.

John Glendinning, 30 Rylands Drive, Mount Vernon, Glasgow G32 OSB

Charity Success

Oxfam's current appeal for personal computer software has so far resulted in contributions of over £10,000-worth of games and business cassettes.

More than 30 manufacturers, as well as private individuals and collectors, have donated their surplus stock, and cassettes are still arriving at Oxfam's North London office.

A spokesman for the charity said: "This reaction to a new appeal has been fantastic! Obviously, we want to thank everybody who has contributed so far as well as to encourage others to give us what they can over the next couple of months!"

The software appeal is due to finish at the end of September, and the date of the special sale will be announced in the near future.

Oxfam, 724 High -Road, Finchley N12 9QD

Quality printing

Retailing at a cost of £375, the TRD is a new printer from Triumph Adler which offers high quality Daisy Wheel printing at 20 characters per second.

This machine is suited for use with personal computers costing from £200 upwards, but is aimed at any system where is an application ROM cartridge

the primary application is word t processing.

A library of over 150 interchangeable print wheels provides a choice of type styles which can be printed 10, 12 or 15 characters per inch or with proportional spacing.

Three versions of the product are available, with either RS232, Centronics or dual interfaces.

The machine is also capable of plotting for graphic applications.

Triumph Adler (UK), 27 Goswell Road, London ECIM 7AJ

Lead for Amstrad

A printer lead to connect the new Amstrad CPC 464 computer to any Centronics compatible printer is now available ex-stock from Computer Services.

The lead is 1m in length and features gold-plated contacts with double wipes on the 34-way edge connector end.

Cost of the lead is £14.87 including postage and packing.

Computer Services, 63 Quilp Drive, Chelmsford, Essex CM1 4YD

Crossassembler immenent

A target release date of September I has been set for a new Z-80 cross-assembling version of Mikro, from Supersoft.

Mikro 80 is being written in 6502 machine code, to run on the Commodore 64; however it will assemble Z-80 opcodes rather than 6502 opcodes.

In a parallel project, Supersoft is investigating the various means by which assembled code can be transferred to the target computer. A direct cable link between the 64 and the Z-80 computer seems the most likely solution.

Supersoft, Winchester House, Canning Road, Wealdstone, Harrow, Middlesex HA3 7SJ

Starter pack

A cassette recorder/player is now being given away free with every new M5 home computer from CRL - the whole package forming the new Starter Pack.

Also included in the package

- "Basic I", introduction to programming, a manual and users' guide, two cassette games, and all the necessary cables to connect the M5 to a TV set.

Additions have also been made to the firm's software range — with eight new game cassettes being introduced.

The six new single game

cassettes are: Bomber Run; Devil Bird, Intrigue, Slots, Stranded, and Wheels. The new Triple game cassettes are: Simon/Granny/Spiders and Squash/Lander/Raiders, Single games are £5.95 each, and triple games are £12.95 each.

CGL, CGL House, Goldings Hill, Loughton, Essex IG10

Starter Pack from CGL, including free cassette recorder/player

You could be on our pages

We welcome programs, articles and tips from our readers. If you feel that your work meets our standards, please submit it to us for consideration for publication.

- Programs must always be sent on cassette. Listings are helpful, but not necessary. Check carefully that they are bug-free. include details of what your program does, how it works, variables you have used and hints on conversion.
- Articles on using home computers should be no longer than 2,000 words. Don't worry about your writing ability — just try to keep to the style in HCW. Articles most likely to be published will help our readers make better use of their micros by giving useful ideas, possibly with programming examples. We will convert any sketched illustrations into finished artwork.
 - Tips are short articles, and brief programming routines. Your hints can aid other computer users.

All submissions will be acknowledged and the copyright in such works which will pass to Argus Specialist Publications Ltd will be paid for at competitive rates.

Keep a copy of your work and include an SAE. Label everything clearly and give a daytime and home phone number if you can. All work for consideration should be sent to:

Dix Mille 48K Spectrum £1.99

CCS, 14 Langton Way, London

I didn't think much to this when I read the sleeve notes. A dice game? I thought even less when I saw the simple standard of screen presentation, and realised it was mostly in BASIC.

How wrong can you be? It's care is called for. riveting, I can't leave the thing alone!!

Up to six players can play, or your Spectrum will do battle against you alone. Six dice are thrown, by machine code, to the screen, then you choose.

When you see what you've thrown, you can take, adding to your score, and/or throw again.

As the number of dice decreases in your turn, the odds against getting a winning combination grow, whilst the odds of throwing three 2's get longer.

You can, however, quit while the going is good, and hand over to the next player. The first to score ten thousand wins.

Sounds boring doesn't it? It's not!! Eventually, I realised that when I'm losing heavily, I have nothing to lose by gambling, and the same applies when I'm well ahead. But if it's neck and neck, D.M.

Double Dealer **48K Spectrum** 26.50

MFM, 141a Camden Rd, Tunbridge Wells, Kent TN1 2RA

Double Dealer features the two well known card games of blackjack, an advanced and expensive form of pontoon, and stud poker, just like the western movies! Your Spectrum is the dealer and opponent.

In both games, the cards are? revealed on a lurid, shimmering; green background, and as graphics go, are something of a disappointment.

No nice kings and queens, just big letters K and Q. There are, however, some good touches in terms of sound routines when cards are shuffled and the games start.

You can gamble away to your heart's content, secure in the knowledge that all the money you're losing isn't real!

There are several levels of difficulty, but you aren't allowed onto the higher ones until you've broken the bank... and that takes some doing!

Your wins and losses are the subject of "humorous" messages. Some of the essential messages disappear rather too quickly.

Certainly, these games will_ allow you to learn the rules, practice, and occupy some time without leaving your chair. The instructions are fairly comprehensive without giving any real clue as to strategy. D.M.

Dombusters Atari 25.50

N.D.S.L., 8 Green St, Willingham, Cambs CB4 5JA

Prepare for take off in this exciting simulation of the famous raid on German dams during World War 2.

You begin in flying school and your object is to blow up the dams of the Upper Ruhr.

Take control of a Lancaster Bomber and fly from England, eventually arriving at the dami where you must carefully aim your bouncing bomb so as to explode against the dam wall.

After successfully breaching the dam you will be promoted to pilot and after each further accomplished mission you are also promoted until you reach the rank of group captain.

Your plane is equipped with machine guns and of course the bombs.

Whilst crossing the channel you may be attacked by ships firing radar controlled missiles and on reaching Europe you will be confronted by enemy fighter aircraft and ack-ack guns.

Be careful not to run out of fuel, though this is replenished, after each mission.

Dambusters features reasonable graphics incorporated on a horizontal and vertical scrolling screen. Sound effects are also quite good, on the whole the game is quite realistic but I found it a little on the slow side. Good luck old boy, roger and out.

COMPETITION

NOW is the time for all TI-99/4A users to get out their pens and spot some differences. The reward for the first 50 winners is a package of software from Warwick Software, of 40 Kingsway, Newby, Scarborough, N. Yorks.

Each package comprises three games (Hoppit, Caveman and Diver) together with the Typing Tutor — and each package is worth more than £21.

Hoppit is a variation on the Frogger-type game. Your task is to guide the frog across the road — avoiding cars and trucks along the way — until you reach the river. Then jump on the back of a turtle, and make your way across river — but watchout for hungry crocodiles.

Once across the river, you simply jump down a grate which gets you home.

The second game is Caveman, an underground exploration game.

Go down a ladder to reach the first level — and all along you have to beware of various obstacles.

A total of five levels have to be passed through before you get the chance to sit on the King's throne at the end of a tunnel which leads off from level five. Once you have achieved this, you're a winner.

We stay a long way down for the third game, but this time not below ground — below water.

Diver gives you the chance to show your swimming skills, and make money into the bargain.

You are in control of a diver whose job it is to recover differing items from the seabed. These include gold coins and human bones.

A ship passes above you, and you have to catch the ship and place

Four of the best from Warwick Software

This week's competition gives all TI-99/4A users the chance to win three great games, and a program to help you improve your typing skills

your bounty in it.

Problems come in the form of ravenous sharks and an octopus.

All three of the games are for Extended BASIC, and Caveman also requires a joystick.

If you want to give the games a rest for a few minutes, and would prefer to spend your time learning — then the fourth program is right up your street.

Typing Tutor, for TI BASIC, is exactly what it says. The program starts off by taking you through the fundamentals — like which key does what.

From that point it gives you training until you reach the final part of the program which is a speed trial.

You will agree that these are fantastic prizes, and all you have to do to stand a chance of winning one of these packages is to try and spot as many differences as possible in the two cartoons below. Good luck

How to enter

Study the two cartoons — there are a number of differences between them. Circle the differences on cartoon B and seal the cartoon and of the rules.

coupon in an envelope, Write clearly the number of differences you found on the back of the envelope.

Post your entry to Warwick Competition, Home Computing Weekly, No.1 Golden Square, London WIR 3AB. Entries close at first post on Friday September 14, 1984.

You may enter as many times as you wish, but each entry must be on an official coupon — not a copy — and scaled in a separate envelope.

Important: please follow carefully the guidelines on entering — incomplete coupons and entries in envelopes with no numbers on the back cannot be considered. If you are a winner, the coupon will be used as a label to send your prize so clear writing is essential.

The rules

Entries will not be accepted from employees of Argus Specialist Publications, Warwick, and Alabaster Passmore & Sons. This restriction also applies to employees' families and agents of the companies.

The How to Enter section forms part

You could be on our pages

We welcome programs, articles and tips from our readers. If you feel that your work meets our standards, please submit it to us for consideration for publication.

Programs must always be sent on cassette.
 Listings are helpful, but not necessary.
 Check carefully that they are bug-free.
 Include details of what your program does,
 how it works, variables you have used and
 hints on conversion.

 Articles on using home computers should be no longer than 2,000 words. Don't worry about your writing ability — just try to keep to the style in HCW. Articles most likely to be published will help our readers make better use of their micros by giving useful ideas, possibly with programming examples. We will convert any sketched illustrations into finished artwork.

 Tips are short articles, and brief programming routines. Your hints can aid other computer users.

All submissions will be acknowledged and the copyright in such works which will pass to Argus Specialist Publications Ltd will be paid for at competitive rates.

Keep a copy of your work and include an SAE.
Label everything clearly and give a daytime
and home phone number if you can.
All work for consideration should be sent to:

Paul Liptrot, Home Computing Weekly, No.1 Golden Square, London W1R 3AB

Its easy to complain about advertisements. But which ones?

Every week millions of advertisements appear in print, on posters or in the cinema.

Most of them comply with the rules contained in the British Code of Advertising Practice

But some of them break the rules and

warrant your complaints.

If you're not sure about which ones they are, however, drop us a line and we'll send you an abridged copy of the Advertising Code.

Then, if an advertisement bothers you, you'll be justified in bothering us.

The Advertising Standards Authority.
If an advertisement is wrong, we're here to put it right.

ASA Ltd, Dept 2 Brook House Torrington Place, London WC1E 7HN

This space is donated in the interests of high standards of advertising

Marmalade, from Mirrorsoft, to addition and subtraction Holborn Circus, London

containing two programs. On side one you have Toyshop, in which you must help Oliver by counting the toys he indicates, putting in your answer using the anwell. keyboard. A correct answer is from Oliver, an incorrect one provokes an angry frown.

The game is aimed at the early learner and the gleeful responses from my three-year-old shows it's near the mark. It is well with easily illustrated. recognisable objects, i.e. boats, teddies and bikes.

The "B" side has a slightly

more difficult game, Lollipops which starts with Oliver asking, "I like lollipops, do you?" It then proceeds first to count folloops and then to eat them This gives a simple introduction

After each section Oliver is seen to be increasing in size This is an educational tape because of the number of sweets he has been eating. My son responded "He'll be sick" and sure enough the next message on the screen was that Oliver felt

Overall this is a good package rewarded with a beaming smile to teach the younger or the slow learning child basic number

Linton Rd, Barking, Essex

These programs, in the "Fun to Learn' series are intended to help you develop mathematical games each with nine levels and automatic difficulty adjustment linked to performance

The first game deals with performance. relative sizes of two rectangles The second deals with mental arithmatic. Give the name of a friend, answer the questions correctly and a nicely animated monster eats your friend. Get them wrong or answer too slowly. and you get eaten

Times, tables and anthmatic are the next two games which are

The final game is called Mystery Numbers. You are given three numbers and a total and you must provide the two arithmatic operators which, Shards, Suite G, Roycraft Hsc, when combined with the three numbers, give a sum which will provide the specified answer This is a challenging test of your deductive logic

Throughout you are given the and logical skills. There are five option to finish the game you are playing and return to the main menu. A score card is maintained enabling you to check your

> An aid to confidence as well as being fun to play A.W.

Dragon Data, Kenfig Industrial Estate, Margam, Port Talbot NA13 2PE

I have to admit that I am becoming a little sceptical of the value of the shape recognition programs I see nowadays. Yes, it is something a computer can do fairly well but it often has little basis in reality

Despite these reservations this . series of games is well thought. out and will teach the four shapes involved quite well to the? pre-school and infant children it. Is aimed at

There are four options from the menu, each leading to a game involving Mr Brock the badger The first shows him at work with his lorry collecting shapes and delivering them to the correct dump. The second involves him playing basketball by putting large and small shapes into the appropriate hoop. He then meets a magician who hides shapes in a magic box and this involves Internory training with the extra iskill of short-term recall. Finally he builds pictures using the

My main criticism is that there: are only triangles, circles squares and rectangles. A bigger set of shapes would have been a mice touch. The graphies are excellent however and will keep Avoung on drens interest wel-

mstructions 70% 80%。 ease of ase graphies 90% 85% value for money

Wake faces and learn to

Shape up and piece together - or learn to count with Oliver. Read what our educational reviewers thought

Facemaker Dragon 32 £10.95

SA13 2PE

educational value I doubt

vocabulary. A child using it has really good fun. to understand and use words dealing with a face in its many instructions variations. Therefore you could ease of use say it "teaches" the correct graphies meaning of such words and value for money immediately reinforces their meanings

The problem is that there is a

great deal of reading involved in understanding what is required in the first place and the child who doesn't understand the Dragon Data, Kenfig Industrial meaning of a word is unlikely to Estate Margam Port Talbot be able to read it either! So we end up in a Catch 22-type situation.

I can't decide about this I believe this program would program. I've seen it on several be best used in a group computers now and I have still to structured situation rather than a be convinced that it is an one child plus micro set-up and 'educational' program it is therefore cannot recommend it interesting and fun but its for home use. But if the educational aspect doesn't worry The aim is to enlarge you then making the faces is [] D.C.

Shards, Saite G. Roycraft Hse, Linton Rd, Barking, Essex

it's a great pay that the government left off the 64 from ils recommended computers for the classroom - especially when a you find software like this

Fun to Learn is a suite of five games written by a teacher and tested in schools (so Shards) ctaim). The strength is that rather than leave you stuck in one game, after each question you can continue or return to the menu. A sixth option enables you to examine a score card which keeps a track of your per formance

You can play Count, in which letters are randomly placed and; the machine measures the time w taken to count the letters.

Mixer is an anagram game which gives clues to help you unravel the jumbled word Calculator is a cumulative sumi which gets progressively more difficult. Starship is a version of hangman and Codebreaker introduces simple codes,

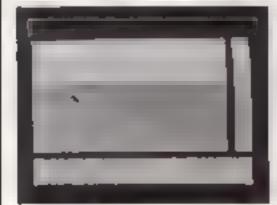

Codebreaker and Starship give i the option to enter your own words so that two children can play the games together

Overall the routines run quickly and effectively and the overall design is good. The use of sound is good and graphics are average. This is a good package which should give hours of fun

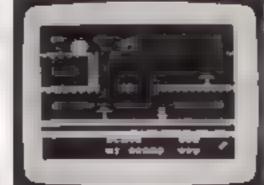

M.W. 8500 instructions 850% ease of use 650% graphics 85% value for money

CLASSIC ADVENTURE. This is the program that started it all. Now you can discover the excitement of Classic Adventure on your Spectrum 48K, Commodore 64, BBC or Electron. If you are masterful enough you too could become a Master Adventurer "The classic brainteaser."

Micro Adventurer: "It's excellent but be warned: it's also very addictive." — Home Computing Meetly

STAR TROOPER is a fast, action packed, machine language game for your Commodore 64. It's a game that will test the best arcade strategists. Amazing graphics and superb sound add to a game that only the bravest will survive!

THE HOBBIT Visit J.R.R. Tolicen's Middle Earth in the most amazing adventure yet devised "A game by which future games will be judged."

- Personal Computing Today "Superior to any other adventure game."

available for the BBC, Oric, Commodore 64 and Spectrum.

H.U.R.G. A revolutionary piece of software for your 48K Spectrum which allows you to develop high quality Machine Language arcade games with absolutely no programming experience. "It is difficult to find fault with such a complete games generation program."

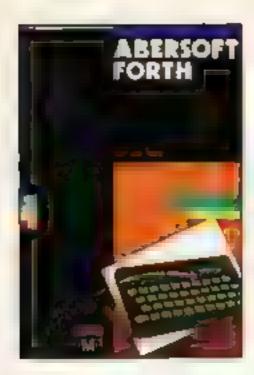

- Crasic

COMMODORE 64 HORACE GOES
SKHING is the sequel to the very successful Hungry Horace in this adventure our hero attempts winter sports. Skiing is complete with slalom flags, trees and moguls so watch out Horace!
"One of the most addictive packages yet encountered."

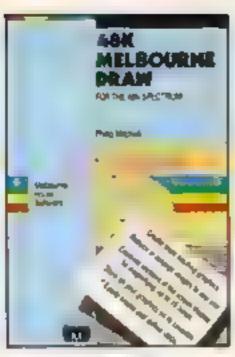

— ZI Computing. Horace Goes Skiing now available for Dragon.

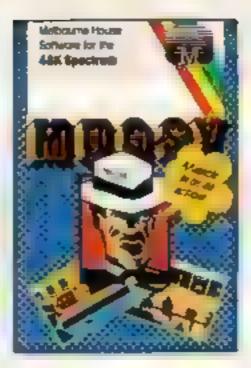

FORTH. Abersoft Forth is an implementation of the Forth Language for your Spectrum 48K. Forth is closer to Machine Code and more than 10 times faster than BASIC. "The only Spectrum package which has been endorsed by the Forth Interest Group"

Simplified User

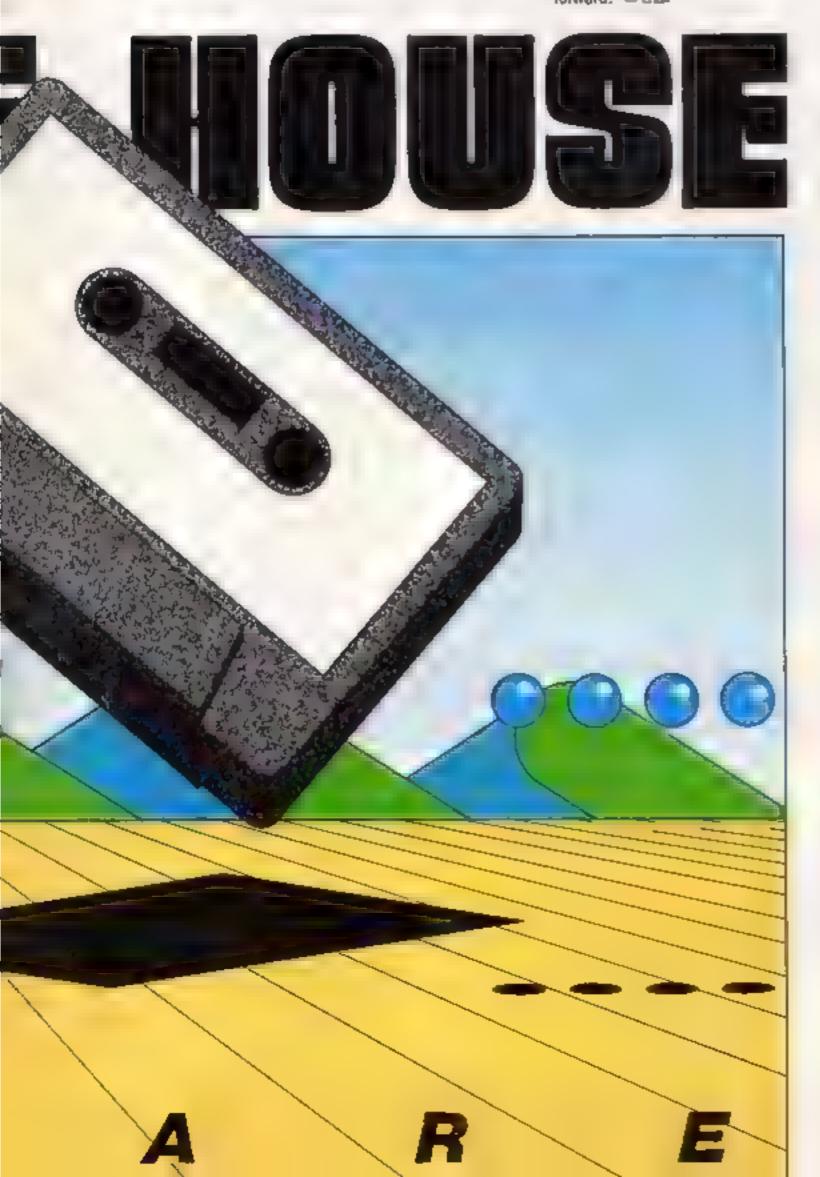

MELBOURNE DRAW. With Melbourne Draw, you can create dazzling, intricate colour graphics and pictures on your Spectrum screen without special programming sknls. "Scores the highest marks in user friendliness, only limited by imagination and artistic talent! Mugsy graphics which were all done using Melbourne Draw are quite stunning". -- Crain.

MUGSY gives a totally new direction for think seekers comic animation in text, stunning graphics and a full arcade game! Mugsy is your one and only chance to become the greatest gang leader with definite ill repute. "Mugsy is definitely the Godfather of all strategy games."

ec cames "Graphics, excellent, with some amazing animation. A game that points the way forward." - CHA

If you've ever fancied getting a rating from the Galactic High Commission, this program from Graham McDonald will fulfil your wildest dreams

From the five-year mission of Star Trek, to the 300 second mission of Space Target with this three-part program. It is in three parts so you can see that loading is taking place correctly.

This is the amount of time you have to destroy as many targets as possible. When your tune is up, you will be told how many targets you have destroyed and what your score 13. By the way, each target has to be hit 25 times before it is destroyed.

You will also be given a rating by the Galactic High Commission.

To make the game harder,

Variables

- a,b position of target x.y position of ship
- d number of destroyed targets
- h number of hits
- e,f colour of target
- z movement of target
- v random laser
- f5,s\$ lasers (23 symbol shifts 0's) final score
- r\$ rating

How it works

10-17 stop tape routine

19-68 beginning routine

69-87 variables

89-98 display routine 99-150 If and Then area

179-308 star display

306-340 time routine

399-500 laser routine

target destroyed 1000-1070

routine

1206-1280 target laser's on and

off routine 1499-1650 ship hit by laser

rousine

1999-2170 finish

5999-6170 instructions

6149-6200 time warning

7999-8030 music routine

9499-9560 pause routine

9599-9890 escape routine

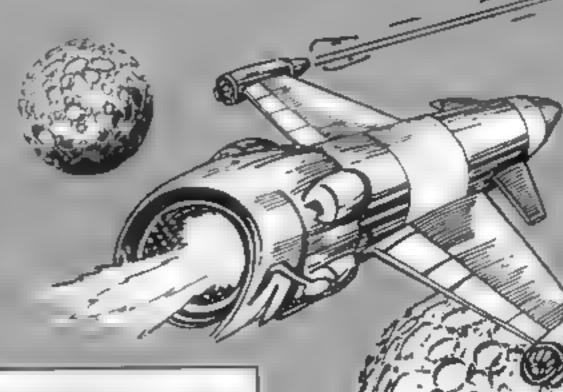

the target has a laser which fires randomly, but this can be switched off and on by keys 4 and 5

Key 8, which is for escape, has a bit extra. It has a routine which asks you if you want to load another program or clear the memory.

You now have the whole of the Galactic High Commission watching your qualities and skills, so now is the time to show enterprise and get as many targets as you can.

UTILITIES

Make a QUANTUM LEAP today...
Our 85 characters by 24 line screen can
transform your SPECTRUM displays now!

"Micro-print 85"

is an outstanding utility that less you select from a choice of SIX character pitches in your screen and ZX printing.

Either 85 characters-per-line,

- or 64 characters-per-line,
- or 31 characters-per-line,
- or 42 characters-per-line, or 36 characters-per-line,
- or 32 characters-per-line,

Any pitch, any time, any place. Mix all six within any line. We even give you a COPY command for any 1 - 24 line group.

"Micro-print" is incredibly versatile nothing else comes close! The 16 & 48K
cassette + Demo are £5 (£6 export) from

Myrmidon Software

64 MONITOR

A machine monitor for the CBM 64
Designed to meet the needs of both the
beginner and expert m/c programmer.
Supplied with a 40 page explanatory
manual. 64 Monitor offers all the usual
commands inc.: ASSEMBLE,
DISASSEMBLE, FILL, TRANSFER,
HUNT, MEMORY, LOAD, SAVE and GO
etc. Supports disc, printer and cassette.

Supplied on rape for £5.95 or disc £7.95

HORIZON SOFTWARE, 15, Banburg Close, Corby, Northants NN18 9PA

FAST TAPE UTILITY

(I commodore

COMPACORE 64 owners, at lost the long wast a over - FASTBACK converts your software to TURBO LOAD - creates first leading copies of most programs (single and must part) that run independently of the utility for example. The hobbit loads in 150 seconds with FASTBACK.
Supplied on table with full instructions.

Onsy £9.95
